

# Neptune or Not?

Cut all the pieces out from page 2, and glue Neptune next to the true facts, and the x next to the false ones.

**Neptune is 17 times Earth's mass.**

**Neptune spins on its axis rapidly because it's not a solid body.**

**Neptune is a warm and dark ice giant.**

**Neptune completes one orbit around the sun every 264.8 Earth years.**

**Neptune has a rocky core.**

**The planet gets its vibrant blue colour from hydrogen in its atmosphere.**

**Neptune has an active and vibrant climate.**
