

Moving Eyes

Instructions

Cut out the boy or the girl, the pupils, and the two small rectangles.

Use construction paper to cut out the same shape of the boy/girl then glue it to its back.

Cut out inside the eyes shapes along the dotted lines.

Glue the tabs and the pupils on construction paper as well, then glue the tabs to your boy/girl from the back as shown in the diagram.

Finally, pass the eyes through the tabs and watch them move!
