

Lungs Model

Instructions

- Cut the bottom of the bottle from its half.
- Tie a knot at the end of a balloon and cut the round end.
- Stretch the balloon around the bottom of the bottle.
- Insert the other balloon in the neck of the bottle, holding the lip of the balloon so it doesn't fall in.
- Fold the lip and neck of the balloon around the bottle opening so that the balloon hangs from the top.
- Pull the bottom balloon and watch the balloon inside the bottle inflate!

Materials needed:

2 balloons
Plastic bottle
Knife

How do our lungs work?
