

Space Boardgame

How does astrology work?

What makes space so cold?

How do space ships fly faster than light?

What keeps space empty?

Can a star turn into a planet?

14

Where is the centre of the universe?

Why is there no gravity in space?

19

Would a guitar sound the same on a space station?

26

Are there different types of black holes? If yes, what are they?

What is the colour of the sun?

32

Galaxies look stationary, so why do scientists say that they rotate?

Is Pluto a planet?

39

How long can a human in outer space last without a spacesuit before exploding?

47

Why does the moon's gravity cause tides on earth but the sun's gravity doesn't?

Instructions

1. Print the first page and laminate it.
2. Cut out the spacemen and glue them to cardboard to make them sturdier. Next, give one to each player.
3. Roll the dice then start going around the board until you reach the finish.
4. Each planet has a question you can find on page 2, and the stars have some slightly harder questions for players to answer.
