

3D Shapes & Properties

Look for things around your house that match each shape, draw them on the frames, then write down how many faces/surfaces, edges, and vertices they have.

The image displays seven 3D shapes, each enclosed within a rectangular frame. The shapes are: an orange pyramid in the top-left frame, a yellow cube in the top-right frame, a pink sphere in the center frame, a green cylinder in the middle-right frame, a purple rectangular prism in the middle-left frame, a light blue cone in the bottom-left frame, and a purple diamond-shaped polyhedron in the bottom-right frame.
