

Materials needed

Water
Dry erase markers
Ceramic plate

Plan what you want to draw here:

Instructions

- Draw the design you want on the plate using markers.
 - Make sure all the lines of your drawing are connected.
 - Slowly pour water off to the side of the drawing in the plate, and watch your drawing come to life!
- Tip: You can move your drawing around the plate gently with your finger.

What do you think is the science behind this?
